

Text to Speech Resources Report

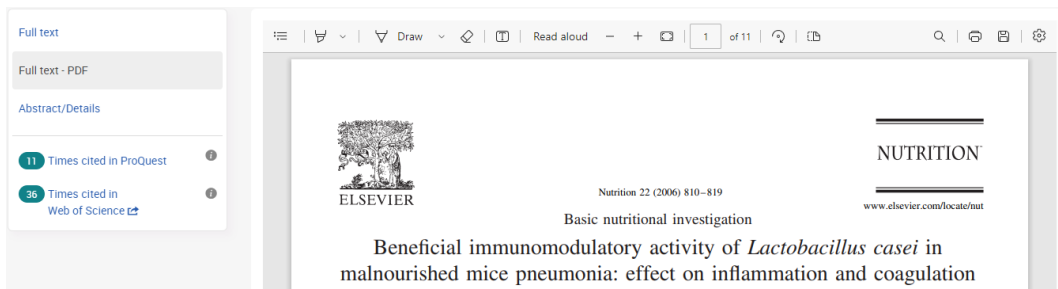

Databases and Tools

Microsoft Edge

The Microsoft Edge browser has a built-in text to speech feature. However, this tool will read the entire page, including advertisements, page headings, etc. Some pages in Edge can be converted to “Immersive Reader Mode.” This tool extracts the page’s content and the text to speech mode can be activated. You can also change font size and style in this mode.

The Read Aloud tool can be unreliable at times. Sometimes restarting the computer can help. The Read Aloud tool can appear in the article page on the database. However, because of its unreliability in this mode, it is suggested that you download the article as a PDF and open the file in the browser to get the tool to work.

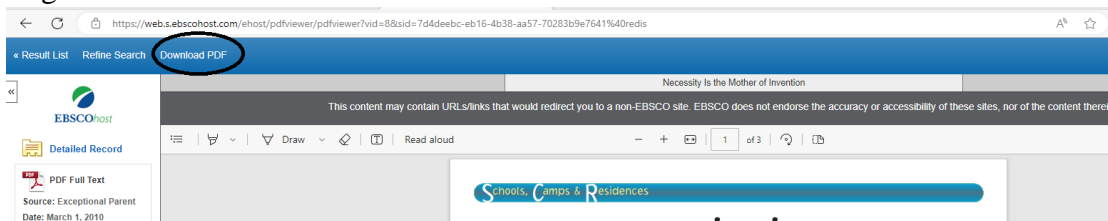

How Read Aloud mode appears in the article page.

It is also worth noting that the read aloud tool has problems interpreting physical texts that have been scanned and then OCR'd.

EBSCO

If articles in an EBSCO database have a HTML full text version there is a built-in text to speech reader. If there is a PDF full text version option, you can download the file and open it in the Edge browser and use the Read Aloud tool.

EBSCO Databases

- Academic Search Premiere
- Arts & Architecture Complete
- Biography Reference Center
- Business Source Premiere
- Child Development & Adolescent Studies

JSTOR

JSTOR currently does not have any in-built text to speech tools. To access the Edge Read Aloud tool you need to download the article as a PDF and open it in the Edge Browser.

JSTOR download PDF icon.

JSTOR Databases

- ARTSTOR
- JSTOR Sustainability

PubMed

PubMed does not have any built-in text to speech tools. Some articles are available for PDF download, but this depends on the publisher of the article. After downloading the article as a PDF, open it in the Edge Browser and use the Read Aloud tool (see Microsoft Edge above).

eBooks

Some eBooks platforms have built-in text to speech readers, and some allow for a PDF download.
